

Condensed Interim Consolidated Financial Statements

For the three months ended July 31, 2026 and 2025

Notice of No Auditor Review of Unaudited Condensed Interim Consolidated Financial Statements

The accompanying unaudited condensed interim consolidated financial statements of Zenith Capital Corp. (the “Company”) as at July 31, 2026 and for the period then ended have been prepared by and are the responsibility of the Company’s management. The Company’s Audit Committee and Board of Directors have reviewed and approved these unaudited condensed interim consolidated financial statements. In accordance with National Instrument 51 – 102, the Company discloses that its auditors have not reviewed the accompanying unaudited condensed interim consolidated financial statements for the periods ended July 31, 2026 and 2025.

Notes to the Condensed Interim Consolidated Financial Statements

For the three months ended July 31, 2026 and 2025

(unaudited)

(Tabular amounts in thousands of US dollars, except for number of shares)

1. General information

Zenith Capital Corp. is a company domiciled in Canada and was incorporated under the *Business Corporations Act* (Alberta) on April 10, 2013. On May 24, 2013, 1741273 Alberta Ltd. changed its name to Zenith Epigenetics Corp. On August 1, 2016, Zenith Epigenetics Corp. changed its name to Zenith Capital Corp. concurrent with an internal corporate reorganization. The reorganization resulted in the transfer of Zenith Capital Corp.'s principal operating assets to Zenith Epigenetics Ltd., a wholly-owned subsidiary, in exchange for additional common shares of Zenith Epigenetics Ltd. Zenith Capital Corp. retained its investment in the royalty preferred shares of Resverlogix Corp. ("Resverlogix"). Resverlogix and Zenith have several directors in common, and thus are considered related parties. As Zenith Capital Corp. owns all of the securities of Zenith Epigenetics Ltd., the reorganization did not result in a change in the ultimate beneficial ownership of the operating assets.

The consolidated financial statements comprise Zenith Capital Corp. and its wholly-owned subsidiaries, Zenith Epigenetics Ltd. and Zenith Epigenetics Inc. (together referred to as the "Company", "Zenith" or the "Group"). Zenith Capital Corp. and Zenith Epigenetics Ltd. are incorporated under the laws of Alberta. Zenith Epigenetics Inc. is incorporated under the laws of Delaware. The Company's head office is located at Suite 300, 4820 Richard Road S.W., Calgary, Alberta, T3E 6L1. The registered and records office is located at Suite 600, 815 - 8th Avenue S.W., Calgary, Alberta, T2P 3P2.

Zenith Capital Corp. is a biotechnology investment company. Zenith Epigenetics Ltd. is a clinical stage biotechnology company developing best in class bromodomain (BET) inhibitors for the treatment of cancer and other disorders with significant unmet medical need. Zenith's epigenetic platform of innovative biology and chemistry has generated differentiated, potent and selective BET inhibitors. Zenith's goal is to be a leading epigenetic company translating bromodomain biology into impactful therapies.

2. Background and basis of preparation

(a) Statement of compliance

These condensed interim consolidated financial statements have been prepared in accordance with IAS 34 – Interim Financial Reporting. These condensed interim consolidated financial statements were approved and authorized for issue by the Board of Directors on September 29, 2026.

(b) Basis of measurement

The condensed interim consolidated financial statements have been prepared on the historical cost basis except for financing rights which are measured at fair value each reporting period.

(c) Functional and presentation currency

The functional currency of all entities within the Group is the US dollar, which is also the presentation currency. All financial information presented in dollars has been rounded to the nearest thousand except for per share amounts.

(d) Use of estimates and judgment

The preparation of the condensed interim consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the amounts reported in these condensed interim consolidated financial statements and notes. Accordingly, actual results may differ from estimated amounts as future confirming events occur. Significant estimates and judgment used in the preparation of the condensed interim consolidated financial statements remain unchanged from those described in the Group's consolidated financial statements for the year ended April 30, 2026.

3. Going concern

The success of the Company is dependent on the continuation of its research and development activities, progressing its core technologies through clinical trials to commercialization and its ability to finance its cash requirements. It is not possible to predict the outcome of future research and development programs, the Company's ability to fund these programs in the future, or the commercialization of products by the Company.

The consolidated financial statements have been prepared pursuant to IFRS applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they come due. The Company has incurred significant losses to date, and with no assumption of revenues, is dependent on its ability to raise additional financial capital by continuing to demonstrate the successful progression of its research and development activities if it is to remain as a going concern.

Notes to the Condensed Interim Consolidated Financial Statements

For the three months ended July 31, 2026 and 2025

(unaudited)

(Tabular amounts in thousands of US dollars, except for number of shares)

3. Going concern (continued)

As at July 31, 2026, the Company had \$0.2 million of cash and was committed to pay \$1.1 million of trade payables, \$4.1 million of accrued liabilities (including \$1.9 million to be settled by way of issuance of equity units to Newsoara BioPharma Co., Ltd. ("Newsoara")), \$2.8 million of non-convertible promissory notes (that are payable on demand), \$22.3 million (principal amount) of secured convertible promissory notes (\$0.5 million that matured in February 2024, \$5.0 million that matured in November 2025, \$0.25 million that matured in April 2026, \$0.25 million that matured in June 2026, \$0.3 million that matures in July 2027 and \$16.0 million that is due on demand) and \$3.2 million of accrued interest. The Company is also committed to pay \$0.2 million for research and development commitments and an estimated \$0.4 million for National Cancer Institute funding (for studies to develop ZEN-3694) over the next twelve months as described further in Note 10. In addition, estimated expenditures over the next twelve months under cancellable agreements with contract research organizations conducting work related to the Company's clinical trials total approximately \$0.1 million.

The Company's cash as at July 31, 2026 is not sufficient to fund the Company's contractual commitments or the Company's planned business operations for the next year. The Company will therefore continue to pursue alternatives to raise additional capital including issuing additional equity and/or debt and/or from other sources such as partnering, licensing and/or sale of assets; however, there is no assurance that these initiatives will be successful. These conditions result in a material uncertainty which may cast significant doubt on the Company's ability to continue as a going concern. The Company will also require additional capital to fund its planned research, development and corporate activities beyond the next year.

These condensed interim consolidated financial statements do not include any adjustments to the amounts and classifications of assets and liabilities, and the reported expenses that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

4. Material accounting policies

The condensed interim consolidated financial statements should be read in conjunction with the Company's annual consolidated financial statements for the year ended April 30, 2026 prepared in accordance with IFRS applicable to those annual consolidated financial statements. The same accounting policies, presentation and methods of computation have been followed in these condensed interim consolidated financial statements as were applied in the Company's consolidated financial statements for the year ended April 30, 2026.

5. Due to Resverlogix Corp. / Due from Resverlogix Corp.

Due to Resverlogix Corp.

Resverlogix and the Company have several of their directors in common and are therefore considered related parties. Resverlogix provides management and administrative services to the Company pursuant to a Management Services Agreement dated June 3, 2013. The purpose of the agreement is to allow the Company to utilize Resverlogix's resources on a cost-effective basis and enable Resverlogix to achieve greater utilization of its resources. As consideration for the services, the Company pays Resverlogix a service fee, consisting of salary and other compensation costs attributable to the services and reimbursable expenses incurred by Resverlogix in connection with the services.

During the three months ended July 31, 2026, the Company incurred an aggregate of \$0.2 million (2025 – \$0.2 million) of services and reimbursable expenses, comprised of \$0.1 million (2025 – \$0.1 million) for management and administrative services provided by Resverlogix, and \$0.1 million (2025 – \$0.1 million) of reimbursable expenses. The reimbursable expenses include proportionate share of rental payments and operating costs (for a laboratory and office that Resverlogix shares with the Company) pursuant to a sublease that Resverlogix has in place with the Company. Zenith owes Resverlogix \$1.1 million (April 30, 2026 – \$0.8 million); this balance is unsecured, payable on demand and non-interest bearing.

Due from Resverlogix Corp.

During the three months ended July 31, 2026, the Company advanced an additional \$1.5 million to Resverlogix (2025 – \$1.0 million). Resverlogix has issued promissory notes to Zenith totaling \$12.9 million at July 31, 2026 (recorded at \$12.7 million, net of a \$0.2 million unamortized loss on asset modification) (April 30, 2026 – \$13.4 million (recorded at \$13.3 million, net of a \$0.1 million unamortized loss on asset modification)); the promissory notes bear interest at 12% per annum, are payable within four months of demand and are unsecured. Outstanding interest receivable on the promissory notes totals \$0.7 million (April 30, 2026 – \$0.3 million).

Notes to the Condensed Interim Consolidated Financial Statements

For the three months ended July 31, 2026 and 2025

(unaudited)

(Tabular amounts in thousands of US dollars, except for number of shares)

5. Due to Resverlogix Corp. / Due from Resverlogix Corp. (continued)

In May 2026, the Company settled \$2.0 million of accrued interest on the \$5.0 million secured convertible note (refer to Note 7 (a)) payable by the Company by way of assignment of an equal amount owing from Resverlogix to the Company to the holder of the \$5.0 million secured convertible note. The settlement of the \$2.0 million of promissory notes principal from Resverlogix was accounted for as an asset modification. The modification of the contractual cash flows was not a substantial modification and did not result in the derecognition of the Due from Resverlogix Corp. balance. The gross carrying amount of the Due from Resverlogix Corp. balance was recalculated as the present value of the modified contractual cash flows, discounted at the original effective interest rate for the Due from Resverlogix Corp. financial asset; this resulted in a loss on asset modification of \$0.1 million, recorded in profit or loss.

The Company's advances to Resverlogix are aimed at preserving and growing the value of the Company's economic interest in Resverlogix in the form of Resverlogix royalty preferred shares (the value of which is largely determined by Resverlogix's clinical development program). The Company and Resverlogix intend to amend their arrangement such that a subordinate security interest over all of Resverlogix's assets will be granted to the Company if the consent of Resverlogix's secured lender is obtained. Subsequent to July 31, 2026, the Company advanced an additional \$1.0 million to Resverlogix, and the Company may advance additional amounts to Resverlogix.

6. Non-convertible promissory notes

The following table summarizes the changes in non-convertible promissory notes outstanding that are due to related parties.

	Liability amount
Outstanding, April 30, 2026	\$ 16,518
Additions of promissory notes	2,500
Repayment of promissory notes	(85)
Reclassification to convertible promissory notes	(16,043)
Revaluation of Canadian dollar denominated promissory notes	(41)
Outstanding, July 31, 2026	\$ 2,849

As at July 31, 2026, secured and unsecured non-convertible promissory notes totaling \$2.8 million are due to three related parties. During the three months ended July 31, 2026, a relative or companies controlled by the relative of the Chief Executive Officer / Chairman of the Company lent an additional \$2.5 million, and the Chief Executive Officer / Chairman of the Company was repaid CAD\$0.1 million. As at July 31, 2026:

- the Chief Executive Officer / Chairman of the Company – an outstanding \$0.2 million (CAD\$0.2 million) promissory note bears interest at 5% per annum, is payable on demand and is secured by a security interest in all of the Company's assets;
- a former director of the Company – an outstanding \$0.3 million (CAD\$0.4 million) promissory note bears interest at 5-8% per annum, is payable on demand and is unsecured; and
- a relative or companies controlled by the relative of the Chief Executive Officer / Chairman of the Company – outstanding \$2.4 million of promissory notes that bear interest at 18% per annum, are payable on demand and are secured by a security interest in all of the Company's assets. In May 2026, the Company amended the promissory notes held by a relative or companies controlled by the relative of the Chief Executive Officer / Chairman of the Company, to grant conversion privileges entitling the holder to convert some or all of the outstanding principal amount of the amended notes and accrued and unpaid interest thereon into common shares of the Company at a conversion price of US\$0.60 per share. To reflect the conversion privileges amendment, \$16.0 million (US\$11.1 million and CAD\$6.7 million) of promissory notes were reclassified from Non-convertible promissory notes to Convertible promissory notes (refer to Note 7(e)). The aggregate amount of all Canadian dollar-denominated notes and corresponding accrued interest were restated into US dollar-denominated notes and accrued interest on the exchange rate on the date of the amendment.

In connection with the additional \$2.5 million advanced by a relative or companies controlled by the relative of the Chief Executive Officer / Chairman of the Company, the Company issued a total of 5,095,000 warrants during the three months ended July 31, 2026. Each warrant is exercisable at a price of \$0.60 per underlying common share for a period of five years from the respective grant dates. The combined fair value of the 5,095,000 warrants was determined to be \$1.1 million and was recognized as a financing cost during the three months ended July 31, 2026.

Notes to the Condensed Interim Consolidated Financial Statements

For the three months ended July 31, 2026 and 2025

(unaudited)

(Tabular amounts in thousands of US dollars, except for number of shares)

7. Convertible promissory notes and other debt

(a) \$5.0 million secured convertible note, current

The following table summarizes the convertible note during the three months ended July 31, 2026.

	Convertible Note
Balance, April 30, 2026 and July 31, 2026	\$ 5,000

In November 2023, the Company entered into a \$5.0 million secured convertible promissory note (the "Note") with a private investor. The Note is secured by a security interest in all of the Company's assets as well as a guarantee up to \$2.5 million by the Chief Executive Officer and Chairman of the Company, and bears interest at 18% per annum and matured on November 17, 2025; the Company has periodic discussions with the holder of the Note regarding the status of the Note. The holder of the Note is able to elect to convert the Note into common shares of the Company at a conversion price equal to \$0.60 per share.

Refer to Note 5 for the May 2026 settlement of \$2.0 million of accrued interest on the Note payable by the Company by way of assignment of an equal amount owing from Resverlogix to the Company to the holder of the Note.

The Note is a hybrid instrument consisting of a financial instrument and an embedded derivative, being the conversion option. The embedded derivative was bifurcated from the host contract and accounted for separately as the economic characteristics and risks of the host contract and the embedded derivative were not closely related. Since the Note can be settled (at the holder's option) with the Company issuing a fixed number of its own shares for a fixed amount of cash, the conversion option is equity-classified. The equity-classified conversion option value of \$14 thousand was measured as the residual amount that results from deducting the fair value of the liability component from the initial carrying amount of the instrument as a whole.

In connection with the Note, 5,000,000 warrants were issued to the Note holder. Each warrant is exercisable at a price of \$0.60 per underlying common share for a period of five years from the closing of the Note. On initial recognition, the warrants were valued at \$0.9 million. Since the warrants can be settled (at the holder's option) with the Company issuing a fixed number of its own shares for a fixed amount of cash, the warrants are equity-classified.

(b) \$0.5 million secured convertible notes, current

In February 2023, the Company closed \$0.5 million of secured convertible notes. The convertible notes matured on February 10, 2024; the Company is currently in discussion with the parties regarding the status of the convertible notes. The convertible notes bear interest at 10% per annum. The holders of the convertible notes are able to elect to convert the convertible notes into common shares of the Company at a conversion price equal to \$0.60 per share.

The secured convertible notes are a hybrid instrument consisting of a financial instrument and an embedded derivative, being the conversion option. The embedded derivative was bifurcated from the host contract and accounted for separately as the economic characteristics and risks of the host contract and the embedded derivative were not closely related. Since the convertible notes can be settled (at the holder's option) with the Company issuing a fixed number of its own shares for a fixed amount of cash, the conversion option is equity-classified. The equity-classified conversion option value of \$14 thousand was measured as the residual amount that results from deducting the fair value of the liability component from the initial carrying amount of the instrument as a whole.

In connection with the convertible notes, 150,000 warrants were issued to the convertible notes holders. Each warrant is exercisable at a price of \$0.60 per underlying common share for a period of five years from the closing of the convertible notes. On initial recognition, the warrants were valued at \$0.02 million. Since the warrants can be settled (at the holder's option) with the Company issuing a fixed number of its own shares for a fixed amount of cash, the warrants are equity-classified.

The following table summarizes the convertible notes during the three months ended July 31, 2026.

	Convertible notes
Balance, April 30, 2026 and July 31, 2026	\$ 500

Notes to the Condensed Interim Consolidated Financial Statements

For the three months ended July 31, 2026 and 2025

(unaudited)

(Tabular amounts in thousands of US dollars, except for number of shares)

7. Convertible promissory notes and other debt (continued)

(c) \$0.5 million secured convertible notes, current

In April 2024, the Company closed a \$0.25 million secured convertible note and, in June 2024, the Company closed an additional \$0.25 million secured convertible note. The total \$0.5 million secured convertible note bears interest at 18% per annum and the two tranches matured on April 25, 2026 and June 11, 2026, respectively; the Company is currently in discussion with the parties regarding the status of the convertible notes. The holder is able to elect to convert the convertible note into common shares of the Company at a conversion price equal to \$0.60 per share. The accounting evaluation of this hybrid instrument (consisting of a financial instrument and an embedded derivative, being the conversion option) is the same as that summarized in Note 7 (b).

In connection with the June 2024 \$0.25 million secured convertible note, 250,000 warrants were issued to the convertible note holder. Each warrant is exercisable at a price of \$0.60 per underlying common share for a period of five years from the closing of the convertible note. On initial recognition, the warrants were valued at \$0.04 million. Since the warrants can be settled (at the holder's option) with the Company issuing a fixed number of its own shares for a fixed amount of cash, the warrants are equity-classified.

The following table summarizes the changes in the convertible note during the three months ended July 31, 2026.

	Convertible debenture
Balance, April 30, 2026	\$ 497
Accretion	3
Balance, July 31, 2026	\$ 500

(d) \$0.3 million secured convertible note, current

In August 2025, the Company closed a \$0.3 million secured convertible note. The \$0.3 million secured convertible note bears interest at 18% per annum and matures on July 29, 2027. The holder is able to elect to convert the convertible note into common shares of the Company at a conversion price equal to \$0.60 per share. The accounting evaluation of this hybrid instrument (consisting of a financial instrument and an embedded derivative, being the conversion option) is the same as that summarized in Note 7 (b).

In connection with the August 2025 \$0.3 million secured convertible note, 300,000 warrants were issued to the convertible note holder. Each warrant is exercisable at a price of \$0.60 per underlying common share for a period of five years from the closing of the convertible note. On initial recognition, the warrants were valued at \$0.07 million. Since the warrants can be settled (at the holder's option) with the Company issuing a fixed number of its own shares for a fixed amount of cash, the warrants are equity-classified.

The following table summarizes the changes in the convertible note during the three months ended July 31, 2026.

	Convertible debenture
Balance, April 30, 2026	\$ 254
Accretion	9
Balance, July 31, 2026	\$ 263

(e) \$16.0 million secured convertible promissory notes, current

In May 2026, the Company amended the promissory notes held by a relative or companies controlled by the relative of the Chief Executive Officer / Chairman of the Company, to grant conversion privileges entitling the holder to convert some or all of the outstanding principal amount of the amended notes and accrued and unpaid interest thereon into common shares of the Company at a conversion price of US\$0.60 per share. To reflect the conversion privileges amendment, \$16.0 million of promissory notes were reclassified from Non-convertible promissory notes to Convertible promissory notes.

	Convertible promissory notes
Balance, April 30, 2026	\$ -
Reclassification from Non-convertible promissory notes	16,043

8. Shareholders' deficiency

(a) Common shares

(i) Authorized:

Unlimited number of common shares.

Unlimited number of preferred shares issuable in series with rights as determined by the Board of Directors at the time of issue.

(ii) Issued and Outstanding:

Common shares	Number of shares	Amount
Balance, April 30, 2026	159,731,828	\$ 95,380
Issued in connection with long term incentive plan	1,288,312	636
Balance, July 31, 2026	161,020,140	\$ 96,016

Investment from Newsoara

In November 2021, Zenith Epigenetics Ltd. entered into a licensing agreement with Newsoara for Zenith Epigenetics' lead compound, ZEN-3694, in Asia excluding Middle East and North Africa ("MENA"), India, and ten Eurasian countries (the "Asian Territories"). Under the terms of the agreement, Newsoara was granted the rights to develop, market, and distribute ZEN-3694 for all indications in the Asian Territories.

Concurrent with the execution of the licensing agreement, in November 2021, Newsoara agreed to subscribe for 10 million units of Zenith by way of completing ZEN-3694 development programs with a budget of \$10 million before December 31, 2023, unless otherwise agreed upon by the parties. Each unit shall be comprised of one common share and one-half of a common share purchase warrant. Each whole warrant was exercisable into one common share at \$1.00 on or before November 14, 2023 (a period of two years from the date of the subscription agreement).

Up to July 31, 2026, the Company issued a total of 7.7 million (of the 10 million) equity units to Newsoara and, in addition, accrued a further \$1.9 million of additional expenditures incurred by Newsoara, for a total of \$9.6 million, with \$0.4 million of additional research and development expenditures remaining to be incurred by Newsoara pursuant to the subscription agreement.

(b) Stock options

The Company's stock option plan has been approved as a rolling 10% plan that allows for reservation of a number of common shares under the plan equal to 10% of the Company's issued and outstanding common shares on an undiluted basis. Additionally, the plan is a reloading plan, which allows for the number of common shares reserved for issuance related to the options under the plan to automatically become eligible to be reallocated pursuant to stock option-based grants upon option expiry, cancellation or exercise. The Company may grant options to its directors, officers, employees and consultants. The majority of options vest over zero to three years and have a five-year term. The stock options are settled by way of the issuance of equity instruments of the Company ("equity-settled").

	Number of options	Weighted average exercise price (CAD)
Outstanding, April 30, 2026	2,046,200	\$ 0.73
Granted	300,000	0.54
Expired	(671,200)	1.39
Outstanding, July 31, 2026	1,675,000	\$ 0.44

The following table summarizes information about the stock options outstanding and exercisable at July 31, 2026.

Range of Exercise Prices (CAD)	Number Outstanding	Weighted Average Remaining Life (years)	Weighted Average Exercise Price (CAD)	Number Exercisable
\$0.34 - \$0.36	1,000,000	2.90	\$ 0.36	700,000
\$0.54 - \$0.56	675,000	2.91	0.55	375,000
	1,675,000	2.90	\$ 0.44	1,075,000

The number of stock options exercisable at July 31, 2026 was 1,075,000 (2025 - 1,490,500) with a weighted average exercise strike price of CAD\$0.43 (2025 - CAD\$0.90).

(unaudited)

(Tabular amounts in thousands of US dollars, except for number of shares)

8. Shareholders' deficiency (continued)

(b) Stock options (continued)

The fair value of each stock option granted is estimated as of the grant date using the Black-Scholes option pricing model. The following weighted average assumptions were used in arriving at the weighted average fair value of \$0.23 and \$0.18 per stock option associated with stock options granted during the three months ended July 31, 2026 and 2025, respectively:

	2026	2025
Risk-free interest rate	3.4%	2.7%
Expected life	4.3 years	4.3 years
Expected volatility	75%	95%
Share value at grant date	CAD\$0.55	CAD\$0.36
Expected dividends	Nil	Nil

(c) Restricted stock units

The Company's long-term incentive plan allows for the reservation of a number of common shares not to exceed 10% of the Company's issued and outstanding common shares on an undiluted basis less the number of common shares reserved under the Company's stock option plan. The Company may grant restricted stock units ("RSUs") to directors, officers, employees, and consultants. The majority of RSUs fully vest over zero to three years.

During the three months ended July 31, 2026, the Company granted 150,000 RSUs (2025 – no RSUs were granted).

The weighted average fair value of the RSUs granted in the three months ended July 31, 2026 was \$0.39 per RSU. The Company estimates the fair value of RSUs based on the estimated fair value of the underlying stock on the date of grant. Director's fees are currently paid by way of the issuance of RSUs in lieu of payment in cash.

	Number of restricted stock units	Weighted average grant date fair value (USD)
Outstanding, April 30, 2026	10,437,248	\$ 0.47
Granted	150,000	0.39
Exercised	(1,288,312)	0.49
Outstanding, July 31, 2026	9,298,936	\$ 0.47

(d) Equity-classified warrants

During the three months ended July 31, 2026, in connection with the additional \$2.5 million (2025 – \$0.5 million) advanced by a relative or companies controlled by the relative of the Chief Executive Officer / Chairman of the Company, the Company issued a total of 5,095,000 warrants (2025 – 860,000 warrants). Each warrant is exercisable at a price of \$0.60 (2025 - \$0.60) per underlying common share for a period of five years from the respective grant dates. The combined fair value of the 5,095,000 warrants (2025 – 860,000 warrants) was determined to be \$1.1 million (2025 – \$0.2 million) and was recognized as a financing cost during the period.

The following table summarizes the changes in equity classified warrants outstanding.

	Number of warrants	Weighted average exercise price (USD)	Equity amount
Outstanding, April 30, 2026	46,941,136	\$ 0.67	\$ 8,288
Issued in connection with promissory notes	5,095,000	0.60	1,072
Outstanding, July 31, 2026	52,036,136	\$ 0.66	\$ 9,360

Notes to the Condensed Interim Consolidated Financial Statements

(unaudited)

(Tabular amounts in thousands of US dollars, except for number of shares)

8. Shareholders' deficiency (continued)

(d) Equity-classified warrants (continued)

The weighted average fair value of the warrants issued during the three months ended July 31, 2026 was \$0.21 per warrant (2025 – \$0.14 per warrant), using the Black-Scholes option pricing model with the following weighted average assumptions:

	2026	2025
Risk-free interest rate	3.1%	2.7%
Expected life	5.0 years	2.8 years
Expected volatility	75%	82%
Share value at grant date	\$0.39	\$0.39

The following table summarizes information about the equity-classified warrants outstanding and exercisable at July 31, 2026.

Exercise Price (USD)	Number Outstanding	Weighted Average Remaining Life (years)	Weighted Average Exercise Price (USD)
\$0.60	30,679,469	3.44	\$ 0.60
\$0.75	21,056,667	2.28	0.75
\$1.00	300,000	0.65	1.00
	52,036,136	2.96	\$ 0.66

(e) Per share amounts

The basic and diluted loss per share have been calculated based on the weighted average shares outstanding:

	2026	2025
Weighted average common shares outstanding - basic and diluted	160,685,329	158,938,983

The effect of any potential exercise of warrants, stock options and restricted stock units outstanding is excluded from the calculation of diluted loss per share in periods where the effect would be anti-dilutive.

9. Expenses by nature

Presentation of expenses is based on the function of each expense. The following details provides a breakdown of the components of the research and development and general and administrative expenses classified by nature.

	2026	2025
Research and development expenses:		
Operating expenses	\$ 104	\$ 248
Personnel costs (short-term employee benefits)	215	269
Share-based payment transaction costs	20	30
Amortization and depreciation	36	29
Total research and development expenses	\$ 375	\$ 576
General and administrative expenses:		
General expenses	\$ 224	\$ 196
Personnel costs (short-term employee benefits)	132	140
Share-based payment transaction costs	258	111
Total general and administrative expenses	\$ 614	\$ 447

10. Commitments

As at July 31, 2026, the Group is party to cancellable agreements with contract research organizations conducting work related to its clinical trials. Corresponding estimated aggregate expenditures over the next twelve months total approximately \$0.1 million (April 30, 2026 – \$0.1 million).

As at July 31, 2026, the Group is committed to expenditures over the next twelve months of \$0.2 million (April 30, 2026 – \$0.2 million), pursuant to various research and development contracts.

The Group is also party to a Cooperative Research and Development Agreement (“CRADA”) with the National Cancer Institute (part of the U.S Department of Health and Human Services) to develop ZEN-3694, the Group’s lead compound, for multiple oncology indications. As at July 31, 2026, the Group is committed to provide additional funding totaling up to an estimated \$0.4 million over the next twelve months.

Zenith agreed to pay Resverlogix for its proportionate share of rental payments and operating costs (for a laboratory and office that Resverlogix shares with Zenith) of an estimated \$0.1 million and \$0.1 million, respectively, for the next twelve months.
