### About Zenith

Zenith Epigenetics Corp. is a biotechnology company developing best-in-class bromodomain (BET) inhibitors for the treatment of cancer and autoimmune disorders in targeted populations with significant unmet medical need. The Company’s epigenetic platform of innovative biology and chemistry has generated differentiated, potent and selective BET inhibitors. Zenith’s goal is to become a leading epigenetic company translating bromodomain biology into impactful therapies. Zenith’s lead product is a pan selective BET inhibitor being developed for hematological malignancies and solid tumors. Zenith is targeting the second half of 2015 to file an IND for hematological malignancies and solid tumors.
